STATE OF CALIFORNIA
OFFICE OF THE
Treasurer

June, 1991

As Chair of the California Debt Advisory Commission, I am pleased to present the *Annual Report 1990: Summary of California Public Debt*. This is the 6th edition of the *Annual Report* and it is intended to provide a statistical summary of public debt transactions which took place in 1990. Information on individual transactions is contained in a companion report, *Annual Report 1990: Calendar of Issues*, which is also available to the public.

As evidenced by the data in this report, debt issuance in California continues to be instrumental in assisting state and local agencies to meet their capital outlay, housing, economic development, and cash-flow needs. The addition of over 750,000 persons each year to California, coupled with the State's aging infrastructure, will likely mean that debt financing will remain a vital part of California's public finance approach through the end of the decade.

This year's report indicates that public debt issuance climbed to over \$24 billion in 1990. The rise in debt issuance represents a net increase of \$1.8 billion (up eight percent) over 1989, with state issuance of short-term notes (an increase of \$2.1 billion) and general obligation bonds (a gain of \$1.4 billion) accounting for the largest shares of this expansion, offset by reduced issuance of local revenue bonds (a drop of \$1.8 billion).

With regard to financing purposes, debt issuance by State agencies for capital improvements/public works (94 percent increase) and for educational facilities (44 percent increase) went up markedly in 1990, while bonds issued statewide for commercial and industrial development (50 percent decrease), housing (5 percent decrease), and redevelopment purposes (37 percent decrease) were off from 1989 levels. State bonds issued for capital improvements/public works (mostly prisons) and education reflect increased voter authorization and greater use of lease-revenue bonds for these purposes, while the decline in the latter three categories appears to be largely attributable to economic factors which reduced demand for these types of improvements.

The *1990 Annual Report* notes the continued growth in the use of certificates of participation (COP's), and limited tax obligation bonds (which includes Mello-Roos bonds) to finance local facilities and equipment. COP's are lease instruments which are marketed in a fashion similar to bonds and which are customarily financed out of the issuing jurisdiction's operating budget. In 1990, local agencies issued \$3.1 billion in COP's, up 11 percent over 1989 and 62 percent more than the amount issued in 1987. Increased use of certificates of participation may be due, in some degree, to the ease and expediency of issuing COP's (i.e. voter approval is not necessary.)

Local agencies issued \$1.5 billion in limited tax obligation bonds in 1990, a one-year jump of 38 percent from 1989, and a 193 percent increase since 1987. These bonds, which are secured by limited taxes such as a sales tax surcharges or Mello-Roos assessments, have become a popular way of financing local transportation improvements and facilities needed to accommodate growth. For instance, 14 counties now dedicate a portion of their sales tax to underwrite the financing of roadway and transit projects. With half-cent sales tax levies recently adopted in Los Angeles and Orange Counties, among others, debt issuance for transportation is likely to remain strong for the next few years.

At the same time, Mello-Roos financings have continued to grow at the local level, totalling \$977 million in 1990 (an increase of 30 percent over 1989). Mello-Roos bonds are secured by taxes imposed on property in districts with prescribed boundaries and are normally issued to support facilities needed to accommodate growth. Since 1983, Mello-Roos financings have become an increasingly popular vehicle to finance streets, parks, schools, and water systems in developing areas and appear to have replaced assessment bonds as the instrument of choice in meeting facility needs in high-growth areas. The Commission is currently reviewing the Mello-Roos financing process and will soon issue a report on this form of public finance.

In publishing this report, the Commission endeavors to assist state and local government officials in managing their public finance responsibilities. Specifically, the information provided herewith can benefit public agencies by allowing them to measure and review their debt issuance within the context of statewide debt issuance activities.

Sincerely,

KATHLEEN BROWN
California State Treasurer
Chair, California Debt Advisory Commission

CALIFORNIA DEBT ADVISORY COMMISSION

The California Debt Advisory Commission is the state's clearinghouse for public debt issuance information. The Commission was created by the California Legislature in 1981 to assist state and local government agencies with the monitoring, issuance, and management of public debt.

The California Debt Advisory Commission members include:

Kathleen Brown
California State Treasurer
and Chairman

Pete Wilson
Governor
or
Thomas W. Hayes
Director
Department of Finance

Gray Davis
State Controller

Robert G. Beverly
State Senator

Lucy Killea
State Senator

Jim Costa
State Assemblyman

Patrick J. Nolan
State Assemblyman

Donald W. Merz
Treasurer-Tax Collector
Sonoma County

Mary E. Turner
Treasurer
City of Anaheim

Additional information concerning this report or the program of the California Debt Advisory Commission may be obtained by contacting:

Steve Juarez
Executive Secretary
California Debt Advisory Commission
(916)324-2585

ACKNOWLEDGMENT

The California Debt Advisory Commission gathers, compiles, and disseminates information on California public debt.

The California Debt Advisory Commission wishes to thank those public agencies which make the timely publication of information possible by promptly filing their reports pursuant to Section 8855(g) of the California Government Code.

So that public debt information may continue to be provided in a useful manner, the Commission would be pleased to receive any comments or reactions to this report.

The principal author of the text of this report was Berma Williams. Other staff members who contributed to the report include Eileen Park, Martha Riley, Virginia Bergman.

ANNUAL REPORT 1990

SUMMARY OF CALIFORNIA PUBLIC DEBT

INTRODUCTION

This report is a summary of information furnished to the California Debt Advisory Commission under the provisions of Section 8855(g) of the California Government Code regarding debt issued by state and local agencies and nonprofit student loan corporations. Data includes information for issuances from January 1 through December 31, 1990, reported to the Commission by February 15, 1991. The data is not audited by the Commission.

The appendix tables summarize public debt issuance by type of debt instrument (e.g., general obligation bonds, certificates of participation, etc.); use of proceeds (e.g., single-family housing, education, etc.); federally taxable financings; financings for the purpose of refunding existing indebtedness; and types of issuing agencies (e.g., cities, counties). As a clarifying note, all percentage comparisons in the report are based on the actual figures, not the rounded version thereof.

Appendix tables begin on page A-1. Summary tables, *California 1990 Public Debt Issuance by Type*, *California Public Debt Issuance by Purpose*, and *California Public Debt by County of Origin* are included in the appendix on pages A-217, A-218, and A-220, respectively. These tables are published regularly in the California Debt Advisory Commission's monthly newsletter, *DEBT LINE*.

The Commission's *ANNUAL REPORT 1990: CALENDAR OF ISSUES* is published as a companion volume to this report. The *CALENDAR* is a compilation of each debt issue reported sold in 1990. It is organized by issuer and, as such, presents the year's history of each agency's debt issuance activity.

SUMMARY

State and local agencies in California issued \$24.1 billion in debt in 1990. This represents an eight percent increase from the \$22.4 billion issued in 1989. It also is the highest level of State and local debt in California since 1986 and represents the fourth year in a row that the total level of debt issued has increased.

Bonds totalled \$12.2 billion and accounted for 51 percent of the total volume of debt sold in 1990. Bond issuance includes debt sold in the form of general obligation, conduit revenue, enterprise revenue, public lease-revenue, limited tax obligation, special assessment, tax allocation, and other bonds.

Issuance of notes by State and local governments totalled \$8.3 billion, followed by \$3.1 billion for certificates of participation and financing leases, and \$471 million for commercial paper. California debt issuance by type is displayed in Chart 1.

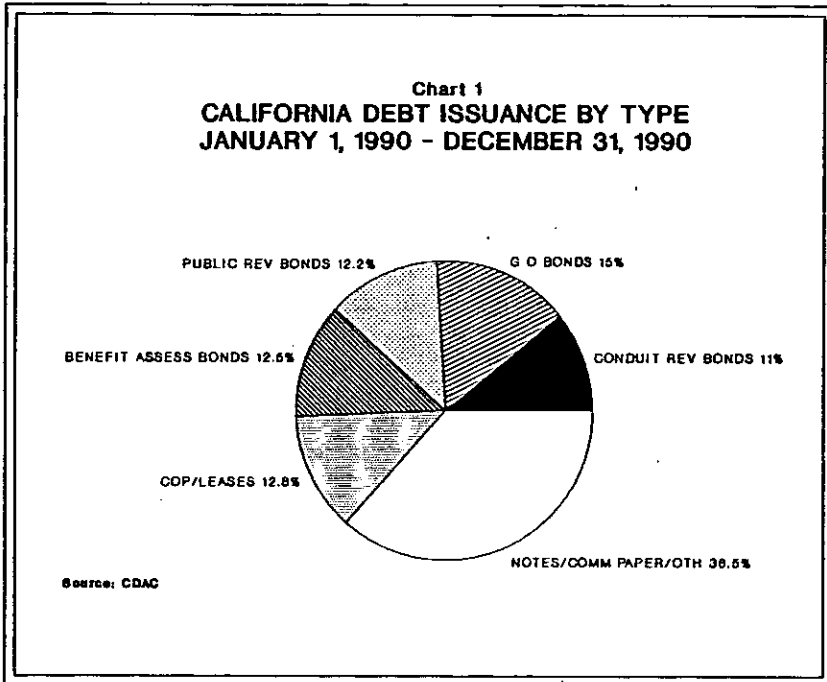

Debt issued for capital improvements/public works and for interim financing each totalled \$8.2 billion, or 34 percent of total state indebted-

edness in 1990 for each of these purposes. Despite increased activity by State agencies, the \$8.2 billion for capital improvements/public works represented a four percent decline from total statewide issuance for 1989, while the amount spent on interim financing reflects a 34 percent increase from 1989 figures for this category.

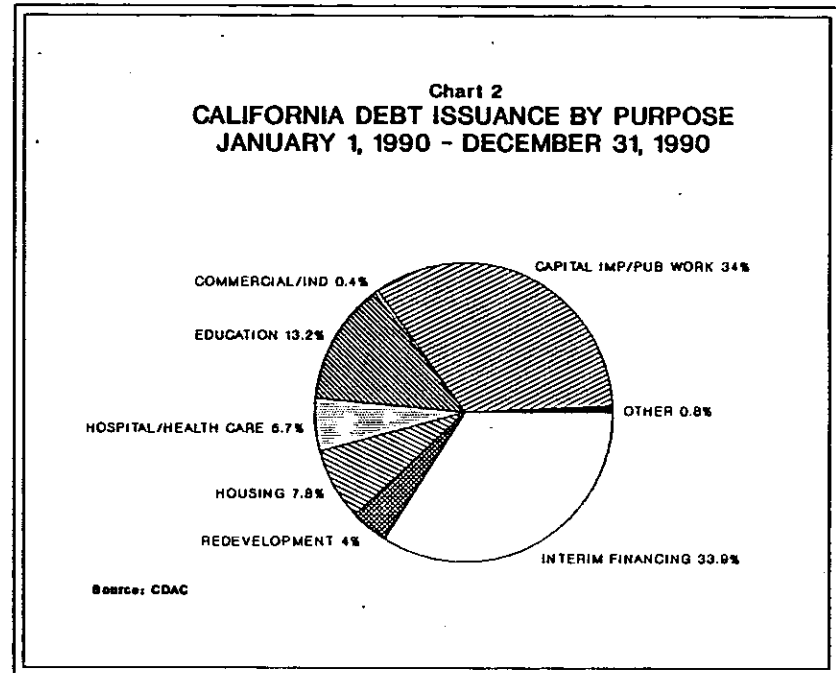

Other purposes include an \$11 million financing for a foster care facility; \$167 million for two self-insurance programs; and \$26.6 million for two issues to acquire local obligations under the Marks-Roos Local Bonds Pooling Act. Chart 2 graphically displays the purposes for which debt was issued in 1990.

Of the 792 public agencies involved in 1990 debt financings, 13 were State issuers and 779 were local issuers. As in 1989, the State of California (not including State departments, agencies, and finance authorities), accounted for the largest percent of the total volume--\$8.1 billion (34 percent of financing done in the State). Other issuers which marketed more than 10 percent of the 1990 volume of debt were cities and counties, each selling \$2.9 billion (12 percent each).

Detailed 1990 debt issuance information by types of issuer is presented in Appendix Tables A-1, A-2, and A-3.

Statewide issuance of debt for education increased 38 percent in 1990, \$3.2 billion as compared to \$2.3 billion issued in 1989. Only half as much debt was issued for commercial and industrial development in 1990, the volume dropping from \$191 million sold in 1989 to \$97 million in 1990. Debt financings for redevelopment totalled \$969 million, a 37 percent decrease from 1989. Other issuances in the purposes category included \$1.9 billion for housing; \$1.4 billion for health care; and \$205 million for other purposes.

STATE OF CALIFORNIA ISSUANCE

The State of California and its various departments and financing authorities sold \$10.5 billion in debt, the highest level of debt ever issued by the State and its related entities. Total debt sold at the State level accounted for 43 percent of the statewide total in 1990.

In the past six years, the State of California has issued its largest volume of debt for short-term, cash-flow purposes. Two revenue anticipation note issues totalling \$5.1 billion represented almost 50 percent of the State's annual financing total. This amount is nearly \$2 billion more than the previous State high for short-term debt. Included in the \$5.1 billion was \$1 billion for a bridge loan note issued in August 1990 for a 30-day period. This financing was conducted to meet the General Fund's cash flow requirements during the period prior to the enactment of the 1990-91 Budget Act.

The State of California issued nearly twice as much in general obligation bonds in 1990 (\$3 billion) as it did in 1989 (\$1.6 billion). The increase in the issuance of State general obligation debt can be traced to heightened authorization of such debt by the State's electorate since 1984. The \$3 billion level of general obligation bond debt reflects an all-time high for general obligation bonds issued in one year. The remaining portion of State issuance was divided between the sale of \$1.6 billion in conduit revenue bonds and \$796 million in public lease-revenue bonds.

State's financing for education totalled \$2.1 billion (\$1.2 billion for K-12 school facilities and \$857 million for college and university facilities), representing an increase of 44 percent from the 1989 total of \$1.5 billion.

Debt issued for state-supported capital improvements/public works increased significantly in 1990, with issuance increasing 94 percent to \$1.4 billion, up from 1989 total of \$744 million. Funding for State prisons accounted for \$904 million of debt sold for capital improvements/public works.

Table 1 shows 1990 State debt issuance by purpose. A detailed

summary of State issuers and the purposes and types of debt financing may be found in Appendix Tables A-9 and A-10.

LOCAL ISSUANCE

Local agency debt issuance declined to \$13.7 billion in 1990. This is nearly a 12 percent decrease from the \$15.4 billion issued in 1989. Local agencies issued 24 percent less in bonds in 1990, while the sale of notes and commercial paper stayed about the same for the year. Conversely, certificates of participation and financing leases were up 12 percent in 1990.

Although total local bond issuance was down, local general obligation bond issuance rose to \$611 million, up 18 percent from 1989. This represents the largest volume of general obligation debt ever issued by local agencies.

Limited tax obligation bonds, which are secured by special taxes such as sales tax revenues or revenues from Mello-Roos special taxes,

totalled \$1.5 billion in 1990. This was a 38 percent increase from the \$1.1 billion issued in 1989 and also represents an all-time annual high.

Included in the 1990 total is a \$26.4 million limited tax obligation bond issue marketed in Japanese yen. This is the first foreign currency financing reported since 1988.

Special assessment bonds in 1990 totalled \$577 million, a decrease of 19 percent from 1989. Decreases were also noted in public revenue bonds (consisting of enterprise, lease and other revenue bonds), down 49 percent, and conduit revenue bonds which decreased by 27 percent in 1990.

Certificates of participation and leases totalled nearly \$3.1 billion, which is a 62 percent increase over the \$1.9 billion sold in 1987. Certificates of participation and leases financings have increased steadily since 1987.

Local agencies issued the largest dollar volume (\$6.8 billion) for capital improvements/public works projects. While accounting for almost half of all local issuance in 1990, debt issued for capital improvements was down 13 percent from the \$7.8 billion sold in 1989 in this category, and is the lowest level of debt issued for capital improvements since 1987.

Significant increases were recorded for local education facilities and substantial drops occurred in industrial development and redevelopment financing. A sluggish economy reduced the demand for these latter two categories of financing.

Table 2 shows local debt issuance by purpose. A detailed summary of local issuers and the types and purpose of debt financings may be found in Appendix Tables A-14 and A-15.

TAXABLE DEBT FINANCINGS

Federally taxable debt issued in 1990 amounted to \$401 million, which is two percent of the total volume of debt issued in 1990 and a marked decline from taxable debt issued in 1989. Taxable issuance for 1989 totalled \$797 million and was five percent of that year's volume. The largest taxable debt issue in 1990 was by the Transmission Agency of Northern California which sold \$250 million in commercial paper.

Issues subject to the alternative minimum tax were also on the decline in 1990, totalling \$1.4 billion, a decrease of \$2.1 billion from 1989. Under the federal Tax Reform Act of 1986, the interest income from certain debt issues--generally private activity bonds as defined in the tax code--may be a preference item under alternative minimum tax and is included as taxable income when calculating tax liability. Appendix Table A-4 summarizes 1989 federally taxable issues.

REFUNDINGS

Refunding prior or existing indebtedness accounted for 13 percent of the total statewide debt issuance for 1990 and amounted to \$3.1

TOTAL	24,133	3,062	12.7

billion. The amount of refunding which took place in California in 1990 represents a significant decrease from the level witnessed in 1986 when refunding levels were \$7.2 billion and comprised nearly 40 percent of the debt issued that year.

State agencies reported that \$1.3 billion of its total debt issuance in 1990 was sold to refund existing debt, while local agencies refunded \$1.8 billion. Table 3 displays total refundings for 1990, by purpose.

As Table 3 indicates, over one-third of 1990 redevelopment financings and 30 percent of housing issues were sold for refunding purposes. The high volume of refundings in these two areas is generally attributed to lower interest rates relative to recent years. Interim financing refunding was primarily for the short-term bridge loan issued by the State of California prior to the passage of the budget in August 1990. The State subsequently issued a \$4.1 billion revenue anticipation note for cash-flow financing for the rest of the year.

Appendix Table A-5 also list individual debt issues which refunded existing debt in 1990.

COMPETITIVE VERSUS NEGOTIATED FINANCING

Issuers competitively bid 25 percent of the financings offered in 1990, for a total of \$6 billion. Negotiated or privately-placed issues constituted the remaining 75 percent (\$18.1 billion), continuing the recent trend toward financing (in total dollar volume) which is competitively bid. Competitive versus negotiated financings showed a 20 to 80 percent split in 1989 and 15 to 85 percent ratio in 1988. One factor in the increased percentage of competitive issues this year is the issuance of more State of California general obligation bonds, which have traditionally been issued under competitive bid. This trend was buffeted by increased competitive sales at the local level, which exceeded 20 percent of total local sales for the first time since the Commission has been recording this information.

DEBT BY COUNTY OF ORIGIN

Public agencies within Los Angeles County issued the largest amount of debt for any one county, totalling \$3.7 billion (126 issues) in 1990, accounting for 15 percent of the total volume issued statewide. Los Angeles County also sold the largest single local debt issue, \$1.1 billion in tax and revenue anticipation notes.

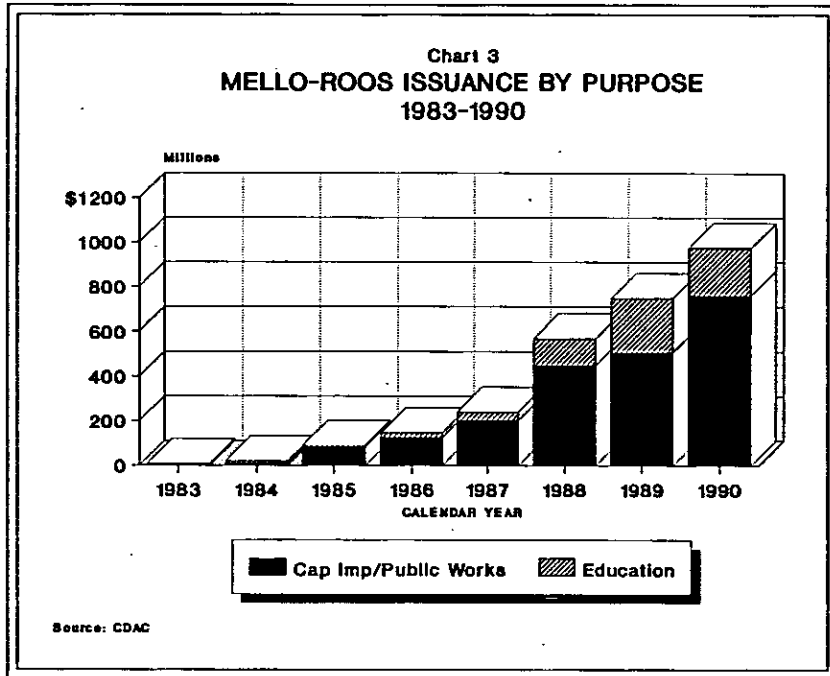

Orange County, with a total issuance of \$1.1 billion, was the only other county that exceeded \$1.0 billion in public debt. The Commission received debt issuance reports from public agencies in all counties except Alpine, Mariposa, San Benito, Sierra, and Trinity in 1990.

Debt issued by *multiple* counties accounted for \$1.8 billion in locally issued debt. This category is comprised of issuers whose boundaries overlap county lines or issuers in two or more counties, (e.g., joint powers agencies, joint unified school districts, and water or irrigation districts).

FINANCING TECHNIQUES OF INTEREST

Mello-Roos

The issuance of Mello-Roos bonds continues to increase with each passing year. Mello-Roos financings increased from one issuance totalling \$8.5 million in 1983 to 73 issuances totalling \$977 million in 1990. Debt issued for capital improvements totalled \$764 million (53 issues), and school financings totalled \$213 million (20 issues). Chart 3 illustrates the increased trend of Mello-Roos financings since the enactment of the Act in 1982. (Detailed summary of Mello-Roos issues is presented in Appendix Table A-17.)

The continued growth of Mello-Roos bond issuance is noteworthy when compared to the decline in special assessment bond issuance in recent years, as both instruments are used to finance the infrastructure requirements of developing areas. The 1990 total special assess-

ment bond issuance of \$577 million represents a 38 percent decrease in issuance since 1988. Thus, it appears that Mello-Roos bonds are becoming the preferred financing vehicle in developing areas throughout California.

Marks-Roos

In 1990, California local agencies reported approximately \$750 million sold under the Marks-Roos Local Bonds Pooling Act of 1985. The Marks-Roos Act expanded the ability of joint powers authorities (JPAs) to finance public capital improvements in three ways: by allowing public entities with different powers, such as cities and school districts, to enter into JPAs agreements; by increasing the types of debt instruments which JPAs can utilize; and by expanding the purposes of which JPAs can issue debt. The Marks-Roos Act was amended in 1987 to also enable JPAs to incur debt to acquire the debt obligations of local agencies.

This Act was again amended in 1990 to prohibit JPA's from purchasing the bonds at a yield greater than the yield on the authority's own bonds; the current certified market yield which the bonds would bear if they were sold to the public; or in the case of refunding bonds, the yield on the bonds paid off by the refunding bonds.

Minibonds

In 1990, only two minibonds issues were marketed; \$141,000 for Mission Viejo, and \$250,000 for Atwater. Minibonds financings are used by public agencies to provide partial funding for local capital improvement projects. They are generally small denomination bonds sold in a limited area to specific buyers. The bonds typically are marketed and serviced by public agencies through their finance departments. The issuances offer the investor tax-exempt interest, as well as provide the citizens in the community the opportunity to participate in local community growth and development.

A-221 Alpine, Mariposa, San Benito, Sierra, and Trinity counties had no reported debt issuances for 1990.

*Figures may not add due to rounding.

Totals may include taxable issuances as well as issuances for the purpose of refunding existing indebtedness.
California Debt Advisory Commission, February 15, 1991

NOTES

1. Figures may include short-term debt, taxable debt, and debt issued to refund existing indebtedness. Amounts are reported to the California Debt Advisory Commission under Section 8855(g) of the Government Code. Figures may not add due to rounding. All percentage comparisons in the report are based on the actual figures, not the rounded version thereof.
2. Long-term includes all issues except interim finance issues.
3. Short-term includes interim finance issues.
4. Negotiated sales include private placements as well as negotiated financings.
5. The type of issuer was determined through a review of the official statement for the financing and/or publications made available by the State Controller's office and others.
6. The total used for the % of total calculation in \$24,133,390,943. Figures are rounded to two digits and therefore may not add to the total.
7. Includes the Los Angeles Department of Water and Power, and the Port of Oakland as well as certain assessment and improvement districts.
8. Includes districts created under the provisions of the Mello-Roos Community Facilities Act of 1982, as amended.
9. Refunding amount is estimated from reports filed with California Debt Advisory Commission, the official statement for the issue, and other available information. This information may be updated as more accurate information becomes available.
10. Includes entities whose boundaries overlap county lines.
11. Issued through the use of a joint issuance technique such as dedicated pools, blind pools, insurance liability pools, and local government COP/TRAN issues.
